Technical Specification

J3421

- 1- The coloured panels** are made with a compact material 13mm thick. It is made up of 70% of softwood fibres and 30% of thermosetting resin, and it stands up to weathering very well (sun, rain, damp, etc.). The coloured surfaces are treated with products based on coloured acrylic polyurethane resins; this enables them to stand up well to UV radiation and resist damage. The customization of the panel is done through printing, secured by a high resistance lacquer.

- 2- The stainless steel fixings** are protected by polyamide anti-vandalism caps.
