Technical Specification

J47102

1- **The coloured panels** are made with a compact material 13mm thick. It is made up of 70% of softwood fibres and 30% of thermosetting resin, and it stands up to weathering very well (sun, rain, damp, etc.). The coloured surfaces are treated with products based on coloured acrylic polyurethane resins; this enables them to stand up well to UV radiation and resist damage.

2- **The 125mm diameter posts and the 95mm square posts** are made of lacquered galvanised steel. The two-tone grey graining finish has a slightly undulating surface for increased scratch resistance. The caps are made of injection moulded polyamide.

3- **The platform floors** are made from a 12.5mm thick, textured, non-slip compact material (HPL).

4- **The tubes** are made of stainless steel, diameter 40mm, guaranteeing lasting durability and reliability of the equipment.

Injection moulded polyamide fixings connect the posts to the platforms and the various play features.

5- **The tubular slide** is made of stainless steel.

6- **The climbing holds** are made of injected polyamide, combining rigidity and sturdiness.

7- **The "Kayak" slide** is made of rotary moulded polyethylene.

8- **The steps of the catwalk** are made with a non-slip rubber overmould.

9- **The gangway floor** is made of solid wood planks, with rubber elements between the planks to avoid all risk of catching a finger.

10- **The stainless steel fixings** are protected by polyamide anti-vandalism caps.
